Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group IV, claims 4-7, 9 in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The restriction requirement is still deemed to be proper and is therefore made FINAL.

Claims 1-3 and 8 are withdrawn from further consideration by the examiner as being drawn to non-elected inventions.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is confusing since it recites that the patient is suffering from diabetic cardiomyopathy in the preamble but does not do this in the body of the claim. It would

Art Unit: 1654

be clearer if applicant simply amended the claim to read that the patient is suffering from diabetic cardiomyopathy in the body of the claim as well.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aspnes et al. (col. 15) or Du Bois (col. 24) in view of Horikawa et al. (col. 13).

Aspnes and Du Bois teach treating diabetes with GLP-1 specifically GLP-1 (7-36).

Horikawa teaches that diabetic patients often experience conditions such as cardiomyopathy.

It would have been obvious to one of ordinary skill in the art to treat someone with diabetic cardiomyopathy with GLP-1 since it is clear from Horikawa that diabetic patients often have conditions such as cardiomyopathy and since Aspnes and Du Bois teach that diabetics can be treated using GLP-1 it would have been obvious to treat diabetic cardiomyopathy with GLP-1.

Claims 4-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Efendic (examples and the claims) in view of Horikawa et al. (col. 13).

Efendic teaches treating diabetes with GLP-1 specifically GLP-1 (7-36).

Horikawa teaches that diabetic patients often experience conditions such as cardiomyopathy.

It would have been obvious to one of ordinary skill in the art to treat someone with diabetic cardiomyopathy with GLP-1 since it is clear from Horikawa that diabetic patients often have conditions such as cardiomyopathy and since Efendic teaches that diabetics can be treated using GLP-1 it would have been obvious to treat diabetic cardiomyopathy with GLP-1.

Form PTO-1449 was not considered since applicant did not supply any of the references.
